SPOT REMOVER “MangiaMacchia”

ID Product Code 045

Pag. 1

ABSORBING POULTICE FOR STONES

Removes stains from marble, granite, stones and other surfaces.

Product description:

The SPOT REMOVER "MangiaMacchia" ("StainEater") is a special poultice, a paste product especially formulated to remove stains on natural stone materials such as marble, granite, limestone, slate, terracotta and ceramics. It cleans the most common stains such as oil, industrial grease, coffee, food, ketchup and other. Its chemical composition allows to deeply absorb resistant stains. New water-based formulation, pleasantly scented.

Chemical characteristics:

Appearance	Paste
Color	Gray / green
Odor	Characteristic scent
Specific gravity at 20° C (68° F)	1,00 ± 0,05
Hydro-solubility	Soluble at every ratio
pH	11,00 ± 0,05
Shelf life at 20°C (68° F)	24 months in original container

Instruction for use

For the removal of oil stains, grease, coffee, ketchup and other. Apply a layer about 5 mm (0,20 in.) thick of SPOT REMOVER MangiaMacchia. After 8/10 hours (at a temperature of 20°C - 68°F) the product dries and it is possible to remove it with a brush. If it necessary, repeat the application until complete elimination. Proceed to removal of the residue with a brush.

Application tools

Spatula

Brush

Suggestion for use and recommendations:

- Before applying the product, mix the paste into the jar in order to blend the components.
- The poultice should adhere well to the substrate to improve its effectiveness. In case of removal of oil stains, make sure that the paste is properly applied, because its adhesion will be less than usual.
- In the event that, after the first application, the stain is not completely gone, proceed to further applications.
- In case of application with particularly high temperatures, very dry climate or the presence of air conditioning, it is recommended to cover the poultice with a plastic film for about 2 hours; this trick will keep the paste wet. Then remove the plastic film and wait for the natural drying of the product.
- Once the treatment with product has finished, it is recommended to wash with our LEM-3 detergent to clean any residue.
- Read carefully recommendations printed on the tin and perform a test before use.

DISCLAIMER All data indicated in this leaflet are the results of tests and experiments carried out in our laboratories and through reliable operators in the stone business and have to be considered reliable.
